

a quick way to
access normal mode command
from insert mode

whoami

- graduated from mathematics department last year
- vim experience:
 - 1.5 years in space-vim by liuchengxu
 - 0.5 year configure my own vim config
- github.com/bruhtus || diawan@pm.me

why?

- convenient
- break the undo sequence easily

how?

- alt or meta key + normal mode command
- ctrl-o insert mode command

alt key + normal mode command

the difference between
alt key + normal mode command
and ctrl-o insert mode command

it's showtime!

the weird alt-a

```
" Ref: https://vi.stackexchange.com/a/2363/34851  
if !has('nvim') | execute "set <M-a>=\ea" | endif  
inoremap <M-a> <C-o>a
```
